Use Determination & Recommendation:

Comments:

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The UAA was conducted in June 2005 and no WBCR was observed at any of the 9 sites evaluated. The stream met both the average and maximum depth criteria at the most downstream site (#349). The committee recommends modifying the use by retaining the WBCR from the mouth to the location of site 353 and removing the WBCR designation upstream from site 353. Site 353 represents the best location where the stream is likely to meet the WBCR depth criteria throughout the recreational season.

Committee Recommendation: ☐ Retain Use ☒ Modify Use ☐ Remove Use ☐ Inconclusive
